STUNNING WOOD DECKING FOR EVERY LIFESTYLE

BEAUTY MEETS STRENGTH

VRIKSHAT

INSPIRED BY NATURE

Certified Wood, Sustainable World

Excellence in wooden decking begins with Vrikshat where superior craftsmanship meets sustainable sourcing. Our premium hardwood decking is engineered to deliver unmatched durability and timeless appeal, elevating outdoor environments with natural warmth and lasting strength.

Vrikshat ensures each plank embodies quality and environmental stewardship. Our decking solutions provide exceptional resistance to weather and wear, offering a low-maintenance investment that enhances both residential and commercial spaces.

Choose Vrikshat for decking that balances elegance, performance, and sustainability crafted to stand the test of time with a commitment to excellence and certified responsible sourcing at every step.

Pure Wood, Pure Creativity

BARE FEET CAN TELL

Yes, any natural wood deck warms up in direct sunlight, but Vrikshat's pure wood decking absorbs less heat than most composite alternatives. It cools down faster as the sun sets, keeping your deck comfortable to walk on whether in sun or shade. Enjoy the unmatched natural feel and comfort of wood that's made to last outdoors.

OUR WOODEN DECKING IS

Revitalize your exteriors with the timeless charm of wooden deckings

Crafted from the finest quality wood, Vrikshat real wood deckings boast exceptional durability and longevity, ensuring a lasting investment for your home or business. Elevate your interior & exterior design with the rich textures and intricate grain patterns of our hand-selected wood deckings, each piece uniquely enhancing the character of your space. With a variety of finishes and styles available, you can customize your surroundings to reflect your personal taste and aesthetic vision.

Thermal modification for enhanced performance

Thermally modified for maximum strength and weather resistance—no chemicals, just pure performance.

Resistance to warping and splitting

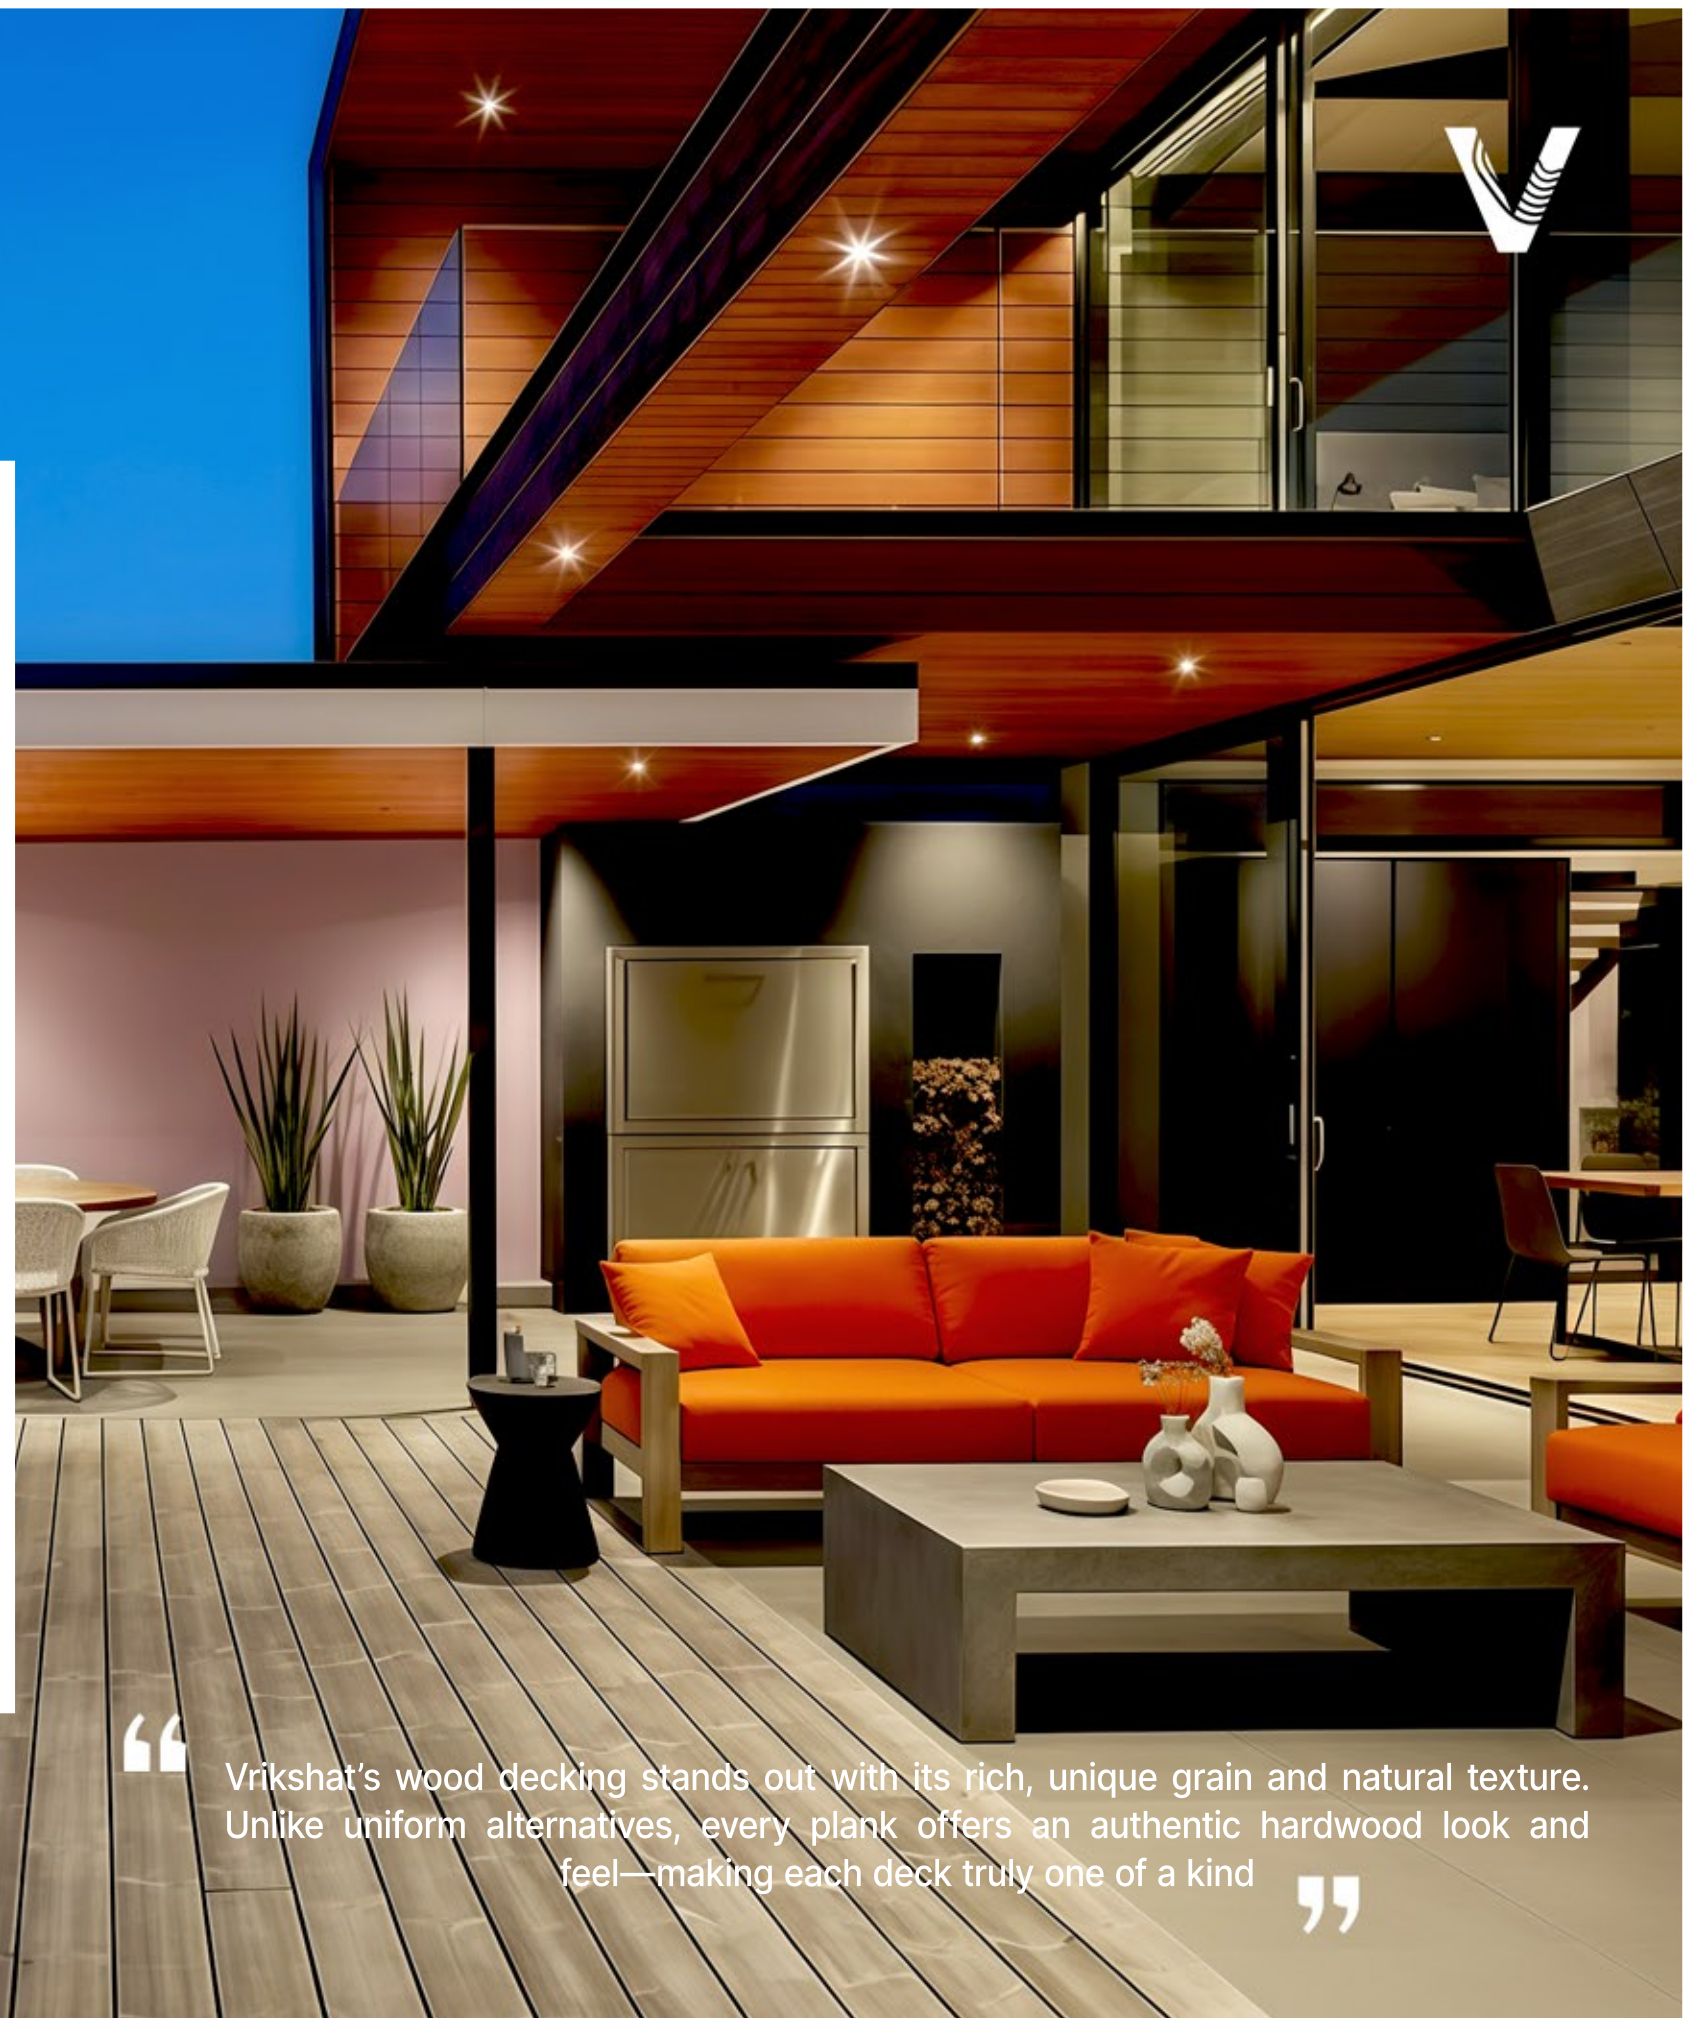

Engineered to resist warping and splitting, ensuring a stable, lasting deck in any climate.

Rich, consistent color options

Features deep, rich, and consistent color throughout each board, maintaining luxury aesthetics year after year.

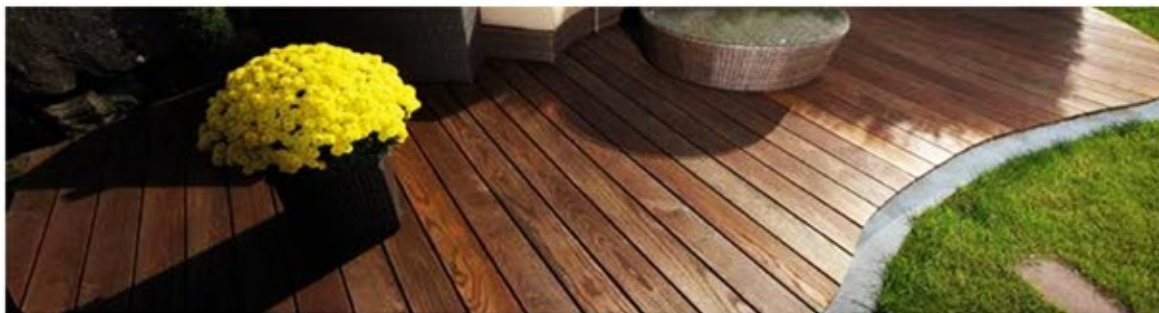

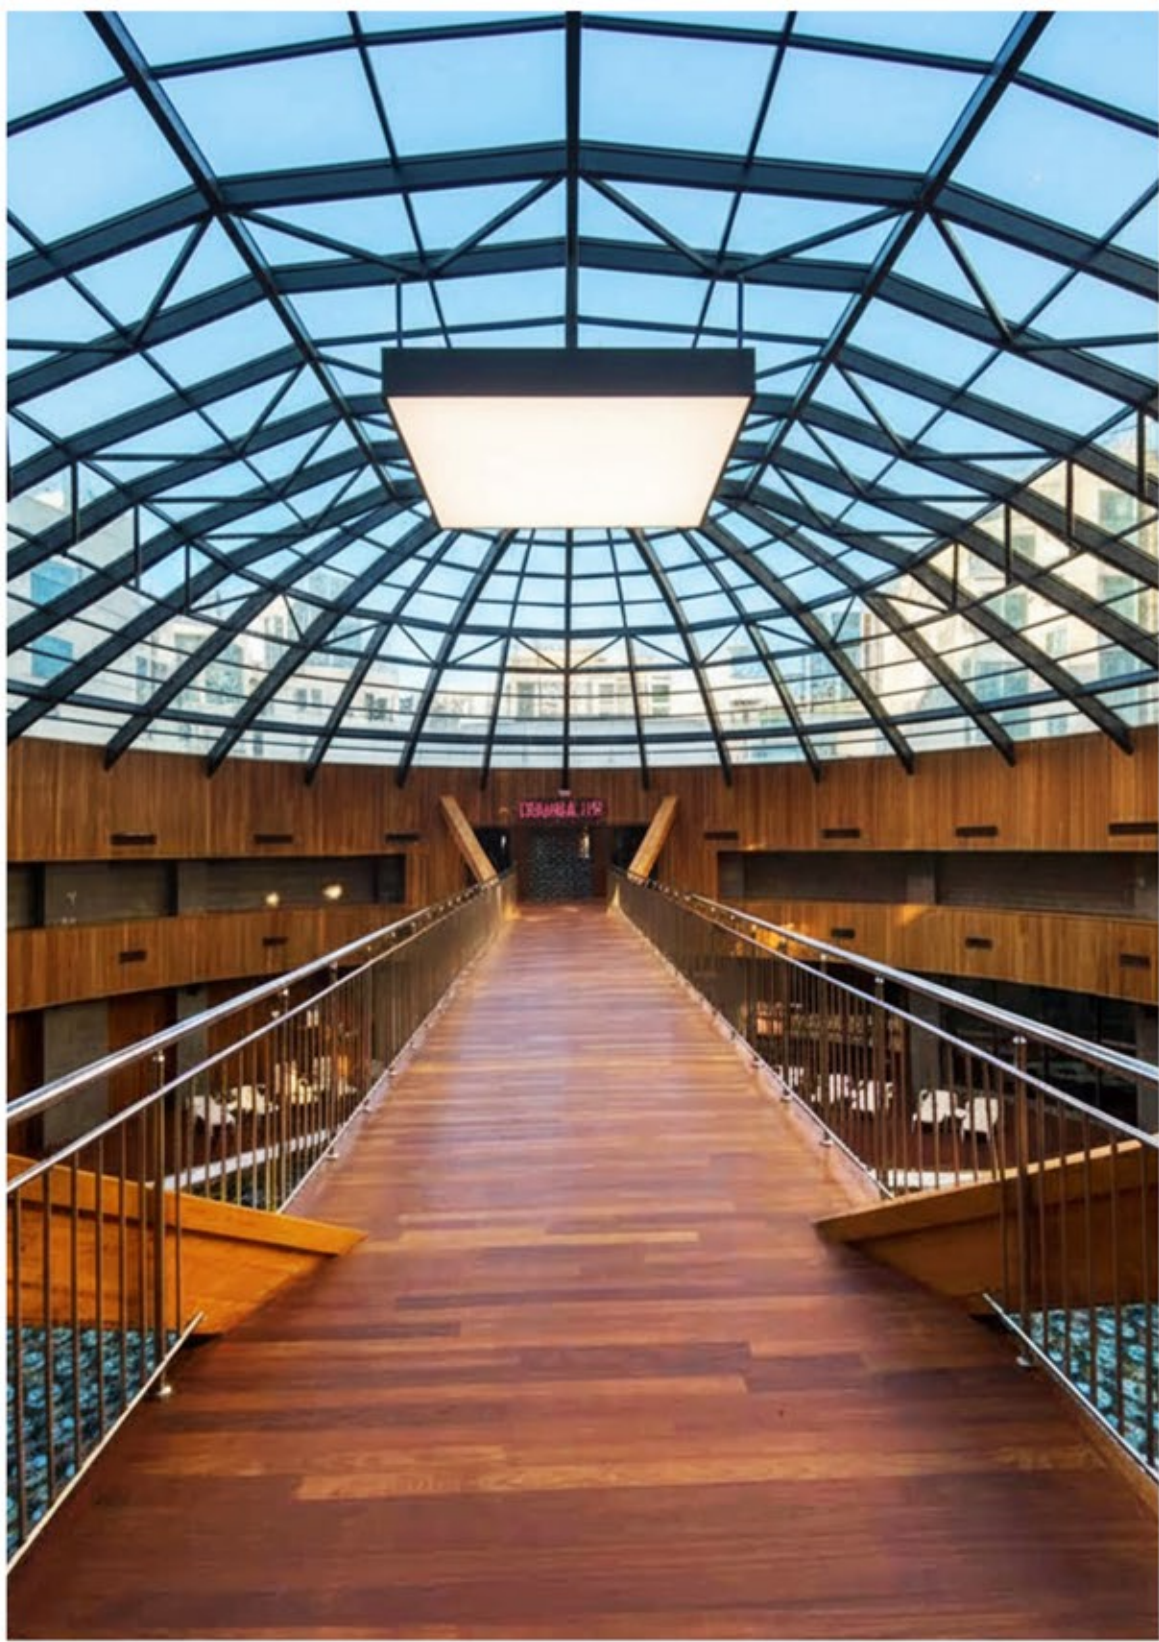

“

Vrikshat's wood decking stands out with its rich, unique grain and natural texture. Unlike uniform alternatives, every plank offers an authentic hardwood look and feel—making each deck truly one of a kind

THERMALLY MODIFIED WOOD

During the manufacturing process for thermally modified timber, the structure of the wood is changed significantly using heat. This considerably increases properties relating to longevity and dimensional stability. Thermally modified timber is also unsurpassed in terms of sustainability. It goes without saying that this process is free from chemical additives.

THERMO ASH

THERMO PINE

THERMO RADIATA PINE

THERMO AYOUS

THERMO OAK

THERMO FRAKE

PLEASE NOTE:

Thermally modified timber is the ideal, reliable partner for your facade. Even the loss of mass, reduced statics or brittleness that arise through thermal modification change nothing in terms of your application in professional facade construction!

- › Native, renewable wood
- › Increased dimensional stability
- › Temperature instead of chemicals
- › Increased durability
- › Reduced swelling and shrinkage
- › No risk assessment for remnants and waste materials

WHY VRIKSHAT THERMO WOOD ?

Experience the timeless beauty and warmth of real wood deckings.

At Vrikshat, we upgrade real wood using just heat and steam—no chemicals. This unique process changes every board from the inside out, making it more stable, weather resistant, and long-lasting.

Our skilled team uses modern technology to carefully control each step. First, the wood’s moisture is gently reduced and Then it’s heated and “steamed” for up to three days. We adjust heat and moisture to fit each wood’s needs.

The result? Beautiful boards that keep their shape year after year.

Vrikshat Thermo Wood Transformation

Untreated Wood Thermo Wood

SEE THE DIFFERENCE
Untreated wood absorbs moisture, cracks, and warps over time. ThermoWood is heat-treated to resist decay, stay stable, and last much longer. It has a rich, deep color throughout, giving you beautiful, low-maintenance wood made to withstand weather year after year.

Why Choose Vrikshat Thermo Wood ?

-  **LASTS LONGER**
More protection against rain, rot, and mold.
-  **STAYS STRONG**
More protection against rain, rot, and mold.
-  **SAFE & NATURAL**
More protection against rain, rot, and mold.
-  **LOW MAINTAINANCE**
More protection against rain, rot, and mold.
-  **RICH COLOR**
More protection against rain, rot, and mold.

Naturally Strong, Beautifully Stable

Thermo Ash is a premium heat-treated hardwood designed for outdoor durability and beauty. Its thermal modification process enhances resistance to decay, moisture, and weather, ensuring long-lasting performance and stability. With warm pale tones and a smooth grain, it adds a modern, elegant touch to any outdoor space.

This eco-friendly treatment improves dimensional stability, reducing warping and shrinking, even in harsh conditions. Thermo Ash requires minimal maintenance and combines natural aesthetics with sustainable strength for versatile use in decking, cladding, and furniture.

Technical Benefits:

Enhanced durability and dimensional stability. Superior weather resistance and slip protection.

Aesthetic Appeal:

Rich, consistent color and smooth, textured surface. Unique grain for elegant outdoor style.

Applications:

Decks, patios, poolsides, walkways, furniture.

ENHANCED DURABILITY, NATURAL WARMTH

Thermo Pine is a premium heat-treated softwood engineered for enhanced outdoor durability and stability. Its thermal modification process improves resistance to moisture, decay, and weather changes, reducing warping and swelling. The rich golden-brown color and refined grain bring natural warmth and elegance to exterior spaces while requiring minimal maintenance.

This eco-friendly wood is sustainably sourced and ideal for decking, cladding, fencing, and outdoor furniture, offering

Technical Benefits:

Thermo Pine offers enhanced durability, dimensional stability, and natural resistance to weather, decay, and slipping.

Aesthetic Appeal:

It features warm, rich tones with a smooth texture and elegant grain, creating a refined outdoor look.

Applications:

Ideal for decks, patios, pool areas, walkways & facades

THERMO FRAKE**LUXURY IN EVERY GRAIN**

Timeless Appeal, Robust Performance

Thermo Fraké is a high-quality heat-treated hardwood, valued for its durability, stability, and eco-friendly performance. The thermal modification process enhances its strength, weather resistance, and natural longevity, making it an ideal choice for outdoor applications.

With its exotic dark-brown shades and striking grain pattern, Thermo Fraké adds a bold and elegant character to decks, cladding, and facades, creating a modern yet natural appeal. Its lightweight nature ensures easy installation, while its lasting beauty makes it a sustainable solution for stylish outdoor living.

Technical Benefits:

Thermo Fraké offers exceptional durability, stability, and resistance to weather, decay, and insects due to its advanced heat treatment.

Aesthetic Appeal:

Its deep brown tones and striking grain pattern create a bold, natural look that adds elegance and character.

Applications:

Ideal for cladding, facades, decking, patios, pergolas, and other premium outdoor projects.

Strength and Beauty Carved Naturally

Thermo Oak is a premium thermally modified hardwood, designed to withstand demanding outdoor environments while maintaining its natural charm.

Its heat treatment gives it remarkable structural stability and long-lasting strength, making it a reliable and sustainable option for exterior projects.

Showcasing rich oak tones and a distinguished grain texture, Thermo Oak enhances outdoor spaces with warmth and character. Durable yet stylish, it is the ideal solution for those who value both performance and natural aesthetics.

Technical Benefits:

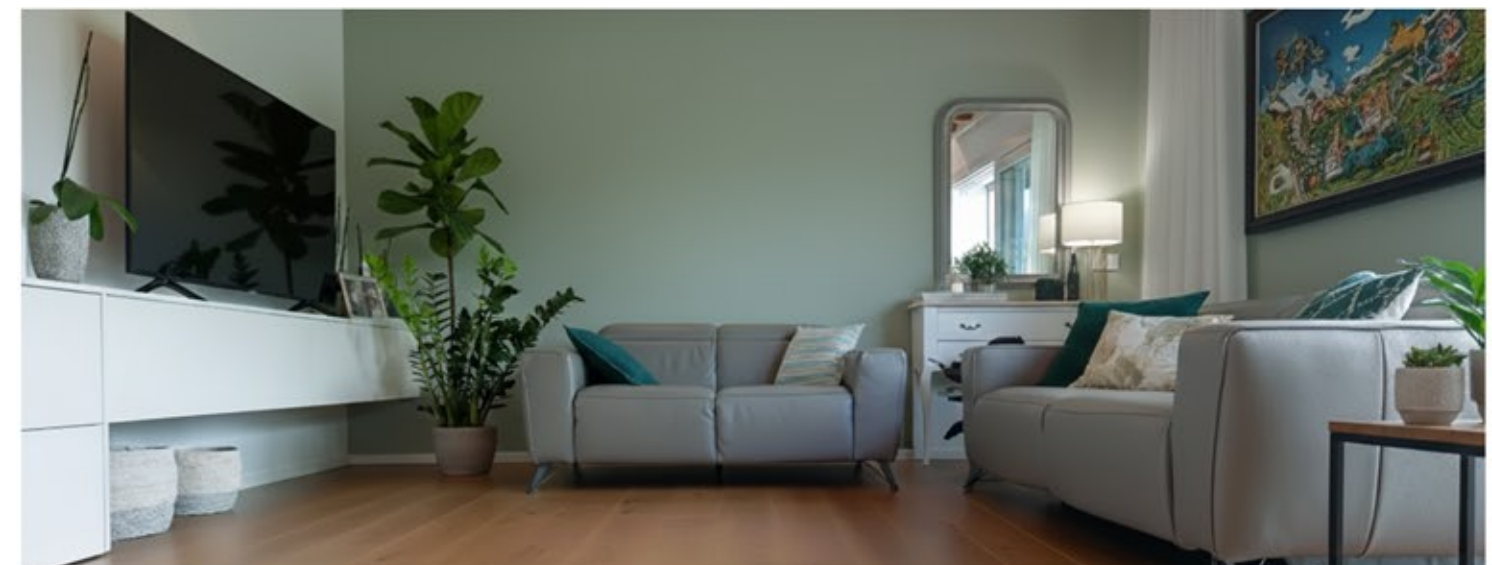

Thermo Oak offers superior durability and stability with strong resistance to moisture, decay, and outdoor conditions.

Aesthetic Appeal:

With its golden-brown hues and refined oak grain, Thermo Oak radiates warmth and timeless elegance, blending seamlessly with both modern and classic designs.

Applications:

Perfect for terraces, garden decks, pool surroundings, façades, outdoor furniture, and premium landscaping features.
